DETAILED ACTION

K-1
6/13 This Office action is in response to the communications filed ~~February~~^{March} 11 and ~~February~~^{March} 13, 2002, Paper Nos. 7 and 9, respectively.

Election/Restriction

Pursuant to 35 U.S.C. 121 and 37 C.F.R. 1.141, the distinct nucleic acid sequences listed in claims 1, 7, 8, 11, 27, 28, 42 and 44 are subject to restriction. As per M.P.E.P. 2434, the Commissioner has partially waived the requirements of 37 C.F.R. 1.141 and will permit a reasonable number of sequences to be claimed in a single application. Under this policy, in most cases one independent and distinct sequence will be examined in a single application without restriction. Those sequences which are patentably indistinct from the sequence selected by the applicant will also be examined.

Claims 1, 7, 8, 11, 27, 28, 42 and 44 specifically claim distinct nucleic acid sequences. Each of these nucleic acid sequences is considered to be structurally independent and distinct, because each has a unique sequence. Furthermore, a search of the appropriate data bases for gene complements and polymorphisms presents an undue burden on the Patent and Trademark Office to search and examine. In view of the foregoing, applicants are required to elect ten claimed sequences from the appropriate claims 7, 8, 27, 28, 42 and 44, and a single, related sequence from claims 1 and 11 of the elected invention.

Art Unit: 1635

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(I).
